

Aspiring to a surgical or procedural career?

Guidance and support for junior doctors

JDocs

Are you?

a newly qualified doctor?

interested in pursuing a career
in procedural medicine?

unsure of the requirements
for specialty training?

Visit the JDocs website (<http://jdocs.surgeons.org>) for guidance around pursuing a career in surgery, and find out how the JDocs Framework can support and guide you to better understand the requirements, and expected standards, for application to proceduralist specialty training.

Subscribe to the ePortfolio (<http://jdocs.surgeons.org>) to access a number of educational resources and assessment tools, developed for the Framework, that support the self-directed junior doctor.

How will access to the JDocs ePortfolio benefit you as a junior doctor?

Engagement with the ePortfolio will enable you to progressively assemble evidence of your achievements, work-based assessments and experiences, which can help support application to proceduralist specialty training.

Subscribing to JDocs gives you access to:

- Generic Surgical Science examination resources and MCQ bank
- select library resources
- eLearning resources developed for junior doctors
- MALT, an online surgical skills logbook
- On-line Key Clinical Tasks

You will be able to:

- develop your professional profile
- gauge your current level of skills and knowledge against the JDocs Framework (self-assessment)
- upload your own personal documents and store them in the ePortfolio, and
- generate a report that documents your career achievements, assessment and experiences that can support application to advanced specialty training.

Also available:

- Free access to surgical skills videos used in the RACS ASSET course
- Essential Surgical skills Kits
